PROFILE

Full stack developer with 8+ years building software and founder of Cosmos, a payments and commerce ecosystem for Latin America on Stellar, Solana and Monad. I design and build products end to end: TypeScript SDKs, APIs, wallets, smart contracts and developer platforms.

EXPERIENCE

Founder · Cosmos · Cosmos Pay Feb 2026 – present
Salta, Argentina

A multichain payments and commerce ecosystem for Latin America. I lead product and engineering for Cosmos Pay: the Payments API, a non-custodial wallet, a TypeScript SDK and a developer platform on Stellar, Solana and Monad.

CEO · CloudyCoding Feb 2018 – present
Argentina

A software studio: custom websites, apps and backends for clients, open source libraries, and free infrastructure for the local tech community.

Full Stack Developer · SaltaDev Feb 2025 – present
Salta, Argentina · remote

Front end and full stack development for the SaltaDev community, plus hackathons and tech events across the region.

Independent developer · Freelance Nov 2018 – present
Remote

Web and backend projects for clients with Node.js, Java, Go and MongoDB: e-commerce, real-time platforms with WebSockets, bots and dashboards.

SELECTED PROJECTS

Cosmos Pay — Payment gateway for LATAM 2026
Payments infrastructure for developers: payment intents, webhooks, stablecoins and fiat ramps, settling in seconds for fractions of a cent.

TypeScript · NestJS · Astro · PostgreSQL · Stellar · APISIX

Cosmos Pay Wallet — Cross-platform non-custodial wallet 2026
A Stellar wallet shipped as a browser extension, Android app, web and desktop: send, swap and track activity, with your 12 words as the only key.

TypeScript · Astro · Rust · Kotlin · Stellar

BancaSDK — Multi-bank TypeScript SDK 2026
The evolution of MacroClickJS, the library for Banco Macro's payment gateway that passed 15,000 downloads in its first week. One client for banking integrations.

TypeScript · Zod · Vitest

SolaDB & MonaDB — Private, replicated on-chain storage 2026
Files encrypted in the browser, sharded with Reed-Solomon and kept by nodes paid for every copy, checked with on-chain storage proofs.

Rust · Solidity · TypeScript

ASide & ArkaCDN — SDKs to build on Arkiv 2026
ArkaCDN turns Arkiv into a content distribution layer; ASide adds profiles, a social graph, feeds, events and 70+ features. Over 1,000 downloads in 3 days.

TypeScript · WebCrypto · Arkiv

StellarOrchestra — AI agents that get paid via x402 2026

A self-hosted AI agent orchestrator: register your agents, share API keys and charge per task with x402 payments on Stellar.

TypeScript · Node.js · Stellar · Cloudflare Tunnel
